BROW LAMINATION AFTER CARE

- Do not wet your eyebrows for 24-48 hours (including excessive sweating from working out or steam),
- Avoid touching the brow area (at the risk of transferring oils),
- Do not apply makeup to the brows for 24 hours post-treatment,
- Do not apply Retin A, AHA's, or exfoliate the brow area for 72 hours *before or after the treatment*,
- No self-tanner products should be used on the face for at least 48 hours post-treatment,
- Apply lacquer brow balm provided by your brow artist daily (we suggest before bed),
- Comb brow hairs into place each day using the brow spoolie brush provided to you

Remember we are chemically treating the brow hairs so it is normal for them to feel slightly dry post-procedure. This is why the aftercare Lacquer Brow Balm is a must.
